

AIR HEATER (WITH FINNS)

Air heaters with fins are tubular heaters with extended fins to increase surface area, enhancing heat transfer to air or gases. Operating at temperatures up to 800°F (427°C), they are ideal for forced-air heating systems and use materials like stainless steel or Incoloy for durability.

APPLICATIONS

- Industrial Ovens & Drying Tunnels
- HVAC Duct Heating
- Shrink Packaging Machines
- Textile & Paper Drying
- Food Processing
- Load Banks
- Space Heating
- Dehumidification
